Career Objective

Aspiring Computer Engineer with strong skills in Java and Python, focused on building reliable, efficient, and well-structured software solutions while continuously improving my technical abilities.

Education

B.E. in Computer Engineering

2020 – 2024

K.C. College of Engineering and Management Studies and Research - Thane

CGPA: 8.17

Projects

Online Food Ordering System | [LINK](#)

- Developed a full-stack web application enabling secure user authentication, menu browsing, cart management, and order processing.
- Designed and implemented RESTful APIs with JWT-based authentication and role-based access control.
- Created a normalized relational database schema with optimized queries to ensure data consistency and scalability.
- Integrated frontend and backend services following Agile SDLC and modular coding practices.

AI Productivity App (SaaS) | [LINK](#)

- Built a full-stack SaaS productivity app (React, Node.js, Express, MongoDB) with AI-powered task and note management.
- Implemented enterprise-grade auth with JWT rotation, Google OAuth 2.0, email verification, and secure password reset.
- Integrated OpenAI GPT APIs for note summarization, smart tagging, task prioritization, and natural-language task control.
- Designed secure RESTful APIs and deployed production stack on Vercel + Render with MongoDB Atlas.

Experience

Python Intern (Virtual)

Nov 2024 – Dec 2024

Oasis Infobyte - Remote

[Certificate](#)

- Developed interactive Python applications with intuitive GUIs (Tkinter/PyQt), integrating APIs to deliver real-time data.
- Built modular, reusable code and optimized algorithms to improve execution speed and scalability across features.
- Implemented data visualization, basic NLP, and security checks using Pandas, Matplotlib, and SpeechRecognition.
- Collaborated effectively in a fully remote setup—participated in stand-ups, used Git/GitHub, and delivered tasks on schedule.

Technical Skills

Programming Languages: Python, Java, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: Spring Boot, React.js, Node.js, Tailwind CSS

Cloud & AI/ML: Oracle Cloud Infrastructure (OCI), AWS, MongoDB Atlas, Generative AI, LLMs

Databases: MySQL, PostgreSQL, MongoDB

APIs & Security: RESTful APIs, JWT, OAuth 2.0, Authentication & Authorization, Rate Limiting, Input Validation

Developer Tools: Git, GitHub, Postman, VS Code, Eclipse, Jupyter Notebook, Vercel, Render

Soft Skills: Problem Solving, Leadership, Communication, Team Collaboration

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | [LINK](#) Sept 2025
- Learn Java Course | [LINK](#) Feb 2025
- Introduction to SQL | [LINK](#) Nov 2024
- The Complete Python Bootcamp: Zero to Hero | [LINK](#) Oct 2024
- Web Development with HTML5, CSS3, and JavaScript | [LINK](#) June 2023

Achievements & Extracurricular Activities

- Participated in competitions such as Project-Master, Tech Quiz, and Debate.
- Led the College Development Committee (CDC) as the Head.
- Achieved Runner-up position in the Chess Blitz tournament.
- Active Rotaract Club member, contributing to community service initiatives at KCCOE.
